DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear whether the applicant is trying to claim the processor module and the brake controller as one unit or multiple units. The disclosure of the instant application supports separate units that together form the brake controller one of which is the processor module.

3. For the purposes of advancing prosecution, the examiner is assuming that the processor module and brake controller are separate units. The examiner suggests that the claims be modified to disclose the processor module as part of the brake controller.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3683

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Joyce, Jr. et al (U. S. Patent no. 5,721,683).

Brake controller 12,20, trainline controller called Locomotive interface unit, electropneumatic controller called pneumatic operating unit, processor module 3.
